

OPTITESLA4M/ OPTITESLA4CTR-V4
4" COMPONENT MIDRANGE

OEM • Precise • Efficient

As electric cars continue to revolutionise the industry, VIBE is proud to lead the way with our latest innovation: brand-new plug-and-play speakers designed specifically for Teslas. Our ultra-efficient OPTISOUND speakers are crafted to deliver stunning audio quality, offering a significant leap in sound performance over factory-fitted speakers. These speakers are guaranteed to provide beautiful, dynamic sound that perfectly complements the advanced technology of your Tesla.

Model	OPTITESLA1T-V4	OPTITESLA4M-V4	OPTITESLA4CTR-V4
Type	Tweeter	Comp Midrange	Comp Midrange
Configuration	2-way	2-way	2-way
Speaker Size	1" (25mm)	4" (100mm)	4" (100mm)
Peak/ RMS power	120W/40W	180W/60W	180W/60W
Sensitivity	92dB	86dB	86dB
Freq. Response	4.5kHz – 25kHz	100Hz – 10kHz	100Hz – 22kHz
Impedance	4Ω	4Ω	4Ω

HIGH EFFICIENCY - When designing the Tesla speakers, creating a speaker with great efficiency was key. We started with a lightweight paper cone paired with a foam surround and finished with a strong and rigid but lightweight carbon dust-cap. The combination results in a lightweight, efficient speaker that uses the huge magnetic force from its Neodymium (NEO) motor to produce incredible output.

SEAMLESS INTEGRATION - Built for Tesla these speakers integrate seamlessly into your OEM Tesla sound system, bolting directly into factory mounting locations and utilising factory plugs and looms for a plug-and-play experience.

SOUND QUALITY - Our Tesla speaker range offer a leap in audio quality over the factory speakers, handling more power with ease. They offer a smooth round sound as a result of their composition of lightweight materials.

PAPER COMPOSITE

With OEM replacement speakers efficiency is key, we are able to achieve great efficiency by using lightweight paper cones these OEM replacement speakers require less motor force to dampen movement.

FOAM

Lightweight a foam surround allows for a dynamic frequency response whilst still keeping good excursion.

COMPONENT

In component speaker sets the Mid and tweeter are separated for improved sound quality, allowing the more directional tweeters to be placed higher up in the vehicle closer to the listener.

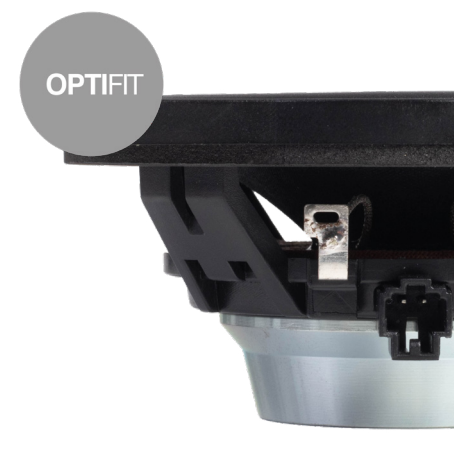

NEO MAG

Powerful neodymium (NEO) magnet to deliver huge motor force whilst keeping the speakers size and weight down.

CARBON FIBER

Carbon fiber dust cap for increased strength and rigidity.

OPTIFIT

Custom basket design that fits directly into OEM mounting locations as well as built in plugs the plug into the factory loom without modification.
